FIG. 2

FIG. 2 is a schematic diagram of an optical system. The system includes a light source (60a) that emits light through a lens assembly (60b). The light then reflects off a mirror (60c) and is directed through a projection assembly (60d, 60e, 60f, 60g). The projection assembly (60g) projects the light onto a target (3) via a lens (3a). The target (3) is mounted on a base (55). The diagram shows the light path as a series of lines originating from the source, reflecting off the mirror, and projecting through the lens assembly onto the target.
